AB YELLOW
Foliar Fertilizer

Product description:
AB YELLOW is a liquid foliar fertilizer based on stabilized, bioavailable Silicic Acid and a mixture of micronutrients including Boron, Molybdenum and Zinc.

AB YELLOW provides the necessary micronutrients to improve growth and yield, plant health and resistance against stresses.

AB YELLOW is intended for the cultivation of a wide variety of agricultural crops including wheat, barley, rice, corn, sunflower, potato, sugar beet, sugar cane, rapeseed and soy.

AB YELLOW is user-friendly and fully biodegradable. It does not leave any toxic residues on plants and is not harmful to beneficial insects.

Application:
AB YELLOW can be used during the vegetative phase during the growing season or in the new year when new leaves appear.

Dosage:
Per ha:
1 liter AB YELLOW while stirring to 300- 500 liter (clean) water.

For Young plants:
0,6 Liter per ha.

Frequency:
Apply a total of 3-4 foliar sprays each 2 weeks during the vegetative phase of the crop. For optimal results per crop, see separate application protocol.

To be used only where there is a recognized need. Do not exceed the advised dose rates.

Hazard & Precautions:
Only for professional use. Do not breathe dust or fumes. Only for use in agricultural areas. If medical attention is required, show this product label to the doctor. Keep out of the reach of children. Do not breathe vapours or dust. F-ON-ABO: 2019-01-15
